DOING THINGS SIMPLY

DTS

Learn how technology provides access to information that reduce employee anxiety and enhance their wellbeing in the workplace under COVID-19 guidelines.

RETURNING TO THE WORKPLACE IN UNCERTAIN TIMES.

Remember the grocery store experience in the early days of COVID-19?

- Not knowing if the store was at capacity and if social distancing was possible before entering?
- Not knowing how long the wait would be when there was a line up outside?
- Not knowing how to navigate the aisles and checkout lines while maintaining social distancing?

Grocery stores quickly adapted to these uncertainties by incorporating security measures such as entrance staff placement to keep track of safe capacity numbers by managing the incoming/outgoing flow of shoppers. They provide shoppers with hand sanitizer and masks before entering the store and established wayfinding and, directional signage to maintain social distancing in the aisles. Similar to the measures grocery stores put in place to provide safety for their patrons, DTS has assembled a series of technologies to return to the workplace for the corporate world.

>> *Companies who had to shift quickly in these early stages demonstrated that providing access to clear information is a key factor in bringing comfort to unfamiliar experiences by making them more palatable and acceptable.*

DTS is a workplace technology company, offering clients physical and digital solutions that make working and collaborating (in person and remotely) easier and more empowering. We design end-to-end solutions that are S.M.A.R.T. (Simple, Manageable, Automatic, Reliable and technologically-advanced.) To ensure experiences remain SMART, DTS offers advanced analytics, proactive-monitoring, 24-5 servicing, and bi-annual "tech-evolution" check-ins. Turning the future of work into something powerfully simple. **DTS. Doing things simply.**

Touchless Visitor Management Systems

- Ability to preregister guests coming on-site and request they fill out a questionnaire on health and/or travel status
- Touchless registration using a smartphone
- iPad at reception to provide barcodes or direction (no touch)
- Alerts contact that visitor is on-site via email, text or UC platform such as Microsoft Teams or Slack
- Option of printing photo ID badge

Greetly

greetly.com

People Counting Sensor Technology

- People counting software/hardware
- Sensors mount over any door, giving accurate number of people per floor, meeting room, washroom etc. Within 98% accuracy
- Alerts can be sent via email to digital dashboards, etc.
- Sensors can tie back to warning lights for red/green visibility. For example; if only 3 people are allowed in a washroom at any one time the light will flash red until one person leaves
- Dashboard can pull info from third party peripherals to provide a complete picture of people moving within a space
